

## PATENT

29. (New) An electrical assembly comprising:  
traces extending toward respective off-assembly connections; and  
essentially parallel portions of the traces traversing apertures defined in one or more  
voltage planes of the assembly to inductively couple compensating crosstalk  
signals having opposing polarity to an original crosstalk signal.

30. (New) The electrical assembly of claim 29,  
wherein the aperture traversing portions of the traces at least partially define integrated,  
co-planar transformer structures.

---

Remarks

New claims are added to conform previously presented subject matter with the  
Examiner's restriction requirement. No new matter is added and no narrowing amendment has  
been made.

<u>CERTIFICATE OF FACSIMILE TRANSMISSION</u>	
I hereby certify that this correspondence is being facsimile transmitted to the Commissioner for Patents, at (703) 305-3431, on the date shown below.
